Just like your Mac shortcuts, Keyboard Macro shortcuts enable you to create and store repeatable functions. Using Keyboard Macro, you can automate repetitive processes without the help of any software. A keyboard Macro helps you avoid repeating the same tasks, saving time and improving efficiency. You can record a sequence of keystrokes to any task or set of tasks. You can even define sequences for complex actions such as calculating a sum or making a copy. You can also use macros to prepare a document, a letter, a bill, a presentation, or anything else that needs to be done multiple times. The performance of your computer will be significantly improved. KEYMACRO Features: • Send out automatic messages to your customer / client / prospect • Record and replay custom created keyboard macros using the on-screen dialog box. • Record macros that send automated or personalized email messages, sms text messages, faxes, mails, or broadcast messages. • Customize to your needs • Record macros that send out automated or personalized email messages, sms text messages, faxes, mails, or broadcast messages. • In addition, you can define and schedule automatic email messages. • Standard Keyboard Macros: o Send out automatically a certain number of personalized email messages or text messages, sms text messages, faxes, mails, or broadcast messages. o Program a business card, a bill or a letter. o Store personal contacts in a contact manager. o Send reminder messages or other email messages. o Send automated or personalized emails. o Send out an announcement in case of a certain event o Browse and import emails, faxes, mails or contacts. o Browse and export emails, faxes, mails or contacts. o Browse and export appointments, events or tasks. o Create or import appointments, events or tasks. o Record a keystroke and replay. o Record multiple keystrokes. o Create or import documents and save as template. o Browse and export documents. • Re-use KeyMacro functions: • Remove individual lines of a macro (record, replay, archive, delete) • Export macros as a text file or record to a serial device. • Convert macros to text (standard, alt, rewind and replay) • Import macros from text files or serial devices. • Export macros from text files or serial devices. • Import and export to and from text files. • Export 70238732e0 [microsoft encarta encyclopedia 2012 free download full version.rar](#)
