Techrowatch is an easy to use and efficient software utility designed to provide you with the means to watch your favorite TV channels, right from your PC's screen, in just a few seconds. The program is quite simple to install and work with. Every time you launch it, Techrowatch enables you to select your favorite television channel, then press the 'Uncover' button to view it. Please note, however, that you need an Internet connection for the application to display anything. Techrowatch allows you to choose from various channels, such as Aaj Tak, Aavaz India, Zee Business or TV9 News, and watch them right on your computer. You can watch TV in windowed mode, but you can double click on the tool's window to view it in full screen. The utility enables you to change the cover, which is the image displayed on the screen when the utility is in stand-by. You can load a picture of your choice, as Techrowatch supports a variety of formats, for instance JPG, PNG or BMP. While the available channels are currently rather few in number, it is likely that their number will increase over time. However, these TV stations are all Indian, making the program less appealing for users from other countries, specifically if they do not speak the language. Additionally, Techrowatch still needs to work out some stability

issues. To conclude, Techrowatch can prove very handy and useful if you want to watch TV on your computer, provided that you are interested in the television channels that the application offers.Q: How do I cast Enum type to its enum values in.NET? This question seems to be a duplicate of How do I cast enum value to its enum type in C#? but it has not received an accepted answer. I did not find a relevant answer to my problem in the other questions as well. My problem is that I have a Enum of type: public enum ColorMode { Color = 0, Grayscale = 1, Multiply = 2, Overlay = 3, Screen = 4 } and I want to cast it to this kind of enumeration: public enum ColorMode2 { None = 0, HSL = 1, RGB = 2, http://lf-printing.com/en/smartblog/2_cras-in-sem-in-arcu-ultrices.html
