

KeyMacro can change all standard player shortcuts like [F3], [Enter], [R], [Shift], [Ctrl], [Alt], [Delete], [Backspace] etc. and can also change any video/audio file shortcut (copy/paste). You can change every single shortcut that comes with a video/audio file, such as [End], [Play], [Pause], [Playlist], [Fullscreen], [Highlight], [Chapter List] etc. It works in 3 modes: 1. In all mode, all shortcuts will be changed (even if the video is started from any external application or media server); 2. Window mode, all shortcuts will be changed within one window (e.g. Google Chrome); 3. Application mode, only shortcuts coming with certain applications (e.g. [F3] will be changed only when the video is played from a video file)

KeyMacro supports many video/audio formats: AVI, MOV, MP4, MP3, FLV, MKV, RM, RMVB, 3GP, MP2, AAC, AC3, M4A, OGG, WEBM, WEBM2, WMA, WV, WV2, MXF, MPEG-1/2/4, WMV, ASF, DAT, MPG, MKB, QT, TS, MPEG-TS, TS2, VOB, VIVO, WMV3, ASF, WVC, QM, 3G2, AVI, MOV, MP4, FLV, MKV, RM, RMVB, 3GP, MP3, FLAC, AAC, M4A, OGG, WEBM, WEBM2, WMA, WV, WV2, MXF, MPEG-1/2/4, WMV, ASF, DAT, MPG, MKB, QT, TS, MPEG-TS, TS2, VOB, VIVO, WMV3, ASF, WVC, QM, 3G2, AVI, MOV, MP4, FLV, MKV, RM, RMVB, 3GP, MP3, FLAC, AAC, M4A, OGG, WEBM, WEBM2, WMA, WV, WV2, MXF, MPEG-1/2/4, WMV, ASF, DAT, MPG, MKB, QT, TS, 70238732e0 [Proshow Producer 6.0.3395 Keygen Download](#)

RegToText is a small free program that changes a binary file to a human-readable text file. It can be used to convert binary files such as databases or other key-value data in a registry in a simple and efficient way. The program works with files created by the Windows Registry Editor and supports ASCII and UTF-8 encoding. With this tool you can easily navigate and edit registry data in a way that's easier to understand.
