KEYMACRO is a Key Management tool for Microsoft Windows. With the Key Macro software you can generate your own macros for use with keyboard combinations. The macros can be used to automate tasks on your PC. With the Key Macro software you can create automatic actions that are triggered by the keys that you define. For example, the macros can be used to start a program, open a document, launch a web browser or search in a search engine. You can include graphical or text macros. The Key Macro software also works with DVD. The macros that you define will be displayed on the title screen of the DVD. To create a macro, you start the Key Macro software, click on the New button, set the name of the macro and select the options, that you want to have in your macro. Then, you can add as many variables as you want for your macro. A macro can include text, as well as graphical variables. The Key Macro software has a number of useful features and you can set up your macros in a way that is convenient for you. With the Key Macro software, it is possible to create customized Windows dialogs. For example, you can use the Key Macro software to design your own dialog for choosing e.g. a DVD to play, your settings or documents to open, or a program to run. The dialog can be customized in many ways. For example, you can add or remove items from the dialog, set up the dialog as a list or as a tree, set the initial values of the variables, set up the display of the dialog, and set the icons of the menu items. You can also add your own graphics for the dialog and you can set up a special animation for each item. The Key Macro software has a number of useful features and you can use the software to create your own dialogs for DVD, Windows or program selections. Key Macro software Features: - Simple installation. - Runs on all Windows versions from XP to Windows 7. - Runs on all Windows platforms (x86, x64). - Compatible with all languages (English, German, Spanish, French,...). - Ability to create a macro to start a program, open a document, launch a web browser or search in a search engine. - Ability to create a macro to control a DVD player, capture a video, download a file, create a PDF, print a document, convert a file format
