

The KeyMacro is an innovative utility that can create easy-to-use macros for Windows XP. With the help of this program, you can record keyboard shortcuts and launch programs to perform certain tasks. It allows you to record the action you want, set a time delay for each action, and then launch the command at a specific time. KeyMacro allows you to record any event or sequence of keystrokes into one or more recorded macros. Each macro can be saved, and then played back later. When you want to use a specific macro, it can be launched without starting the whole application. AutoHotKey Description: AutoHotKey is a free Windows utility that enables you to create hotkeys for frequently used and repetitive tasks. It can record hotkeys and then send them to Windows. For example, you can press Alt+R to open the Windows Run dialog box. The keystrokes can then be recorded, and a new AutoHotKey script can be created. You can also record hotkey macros as shortcuts. When you create shortcuts with AutoHotKey, they can be invoked from anywhere on the Windows desktop. You can move the shortcut, use it as a desktop icon, or even modify its behavior.
