At the beginning there is no definition of keymacro module, you must define it yourself You can assign the macro to any key combination and choose how long it should be active (frames or seconds). How to add the definition: Click on the "+" button, which appears in the bottom right corner, and add the keymacro definition. Definitions are placed in a folder and named with the definition name and language (bulk_definitions) Usage: Assign the desired keymacro to a key combination and decide how long it will work (in seconds) Users of Impetus have the option of using the default definition for the keymacro, or changing it to match their preferences. To add the keymacro definition, click on the "+" button that appears in the bottom right corner, and select "Add to default" or "Add to user", as per your choice. Import the definition: Click on the Impetus logo in the bottom right corner and choose "Import from file". The program will open a dialog box where you can choose the definition file you want to import. Export the definition: Click on the Impetus logo in the bottom right corner and choose "Export to file". The program will open a dialog box where you can choose the file type of the export. Importing and exporting the definition file is also possible from the file menu Remove the definition: Click on the Impetus logo in the bottom right corner and choose "Delete from user". The program will open a dialog box where you can select the name of the macro you want to delete. Export the definition: Click on the Impetus logo in the bottom right corner and choose "Export to file". The program will open a dialog box where you can choose the file type of the export. Remove the macro: Click on the Impetus logo in the bottom right corner and choose "Delete from file". The program will open a dialog box where you can select the name of the macro you want to delete. Repeat the macro: In the Macro submenu click on the "+" button, which appears in the bottom right corner, and select "Repeat". In the repetition menu, you can choose how many repetitions of the macro should be done. If the macro will be repeated, it will be disabled and, if it is enabled, it will start in 1st repetition. When to use the macro: https://lavozdelriotarqui.com/index.php?option=com_kide
