Histone modification represents a major component of the epigenetic mechanisms of gene expression. The study of histone modifications at specific genomic loci is essential for understanding how information is transferred from DNA to chromatin. The dynamic nature of histone modifications makes them a reliable readout of the genome and a potential source of additional regulatory cues. At the same time, because the levels and activities of histone modifying enzymes are tightly controlled, histone modification is more likely to be a regulated event than a global and stable event. This review focuses on new developments in our understanding of the mechanisms that control histone modification as well as their functional significance.Q: Using JNI, how can I get the current selected text of a JTextArea? REI's Monster-Fueled K9 Kiter: A Big Boat with an Ultralight Frame Sponsored Humans might be bigger, stronger, and faster than dogs, but now there's a new canine athlete on the block: the K9 Kiter. This weekend, what's become one of the biggest and best camping events in the world takes place: the 2017 North American Outrigger Kiteboarding (NAOK) in St. Petersburg, Florida. More than 900 competitors, a half-million spectators, and more than $500,000 in prize money will be spread across five fields, with more than 600 competitors and two new kites at the Central Field. If you want to be one of them, here's what you need to know about how to get up and down the skies during NAOK's two-day event, which runs April 25-26. Getting on the water You'll need a boat. The first thing you'll need to do, whether you're a new or experienced kiteboarder, is find a buddy with a boat who is willing to ferry you to and from the water. The cost of the ferry is determined by how much you've kited and how much your team wants you on the water. You can typically get a $25 to $30 ferry ticket for yourself or a whole team. A great option is Liquid Racing, a team of seasoned kiter pros who have been providing the shuttle service since they started NAOK in 2005. If you decide to get a ferry, be prepared to pay extra for both the price of the shuttle and the cost of your kite. Do yourself a favor and purchase a tow line so that your kite stays attached to your board during the entire ride. So if you've got a boat, now what? Climbing aboard. There are three ways to get into the boat: by climbing over, climbing up, and climbing in. In a nutshell, climbing over the side means you'll get soaked and may even rip your suit. Climbing up
