Allegedly Your character has the power to generate and use super powers which isnt his sole purpose. Anyway, though fun to play youll need to try it out, and then only judge for yourself. You get about 6 hours of play-time before the game stops and you have to take a break. However, theres a 40 hour chapter pack on the way for those who would like to prolong the proceedings a bit. But theres only so long you can before you need to take a break and calm your nerves. 9/10

Gameplay: As you can see from the screenshots, the game can be played with various play styles. You can take a non-violent path of course, by just running in and using your superpowers to take over the enemy base. However, if you want to really challenge yourself, you can play it hard and use your powers to attack and destroy your enemy base so they have to leave. In the case of the beta, I did that. I did also find one thing that was rather shocking, and that's the way in which your character walks. What I mean by this is that theres no animations at all for your character walking. Its just a "walking" animation.

Graphics: The game's graphics are simple and efficient. But as I said before, the character art isnt very good so you cant really get an idea of how the game should play by looking at it. 9/10

Gameplay:- Well as you can see, the game is simple to play. Theres a story mode, mission mode, unlimited mode and challenge mode. As the challenge mode seems to take quite a while to get through, thats how I played it. The missions are self-explanatory with the usual 6 or 8 of them. The story mode offers you around 5 to 6 chapters depending on difficulty level, for each one you gain up to 5 points which you can earn as you go along. Ive played through some chapters and have had fun. The main feature of this game is that it uses multiple play styles, as well as the usual shoot-em-up. And you can do so while leveling up the power you have. I will never forget the character names that you get in the game. (If youre wondering, on my screenshot "Noob" is when you level up. And "Ninja" is a class you can unlock after getting to Rank 10

What's new in Laser Droplets:

Jones turned day into night, moving from classroom to classroom and never stopping until he actually ran for the buses, then the parking lot and finally to where he had to be. And there was nothing but black in every direction, so black, the realization made him shudder. **GOD GAME RUBY'S TONGUE CRACKED** the softness of his bottom lip, clamping down just to the depth of a slight tremor in his pussy. He felt that tremor and knew that she was right, and that he, too, would cum. She pulled away, the relief coursing through her as he felt his cock rise and the first wad of cum, delicious as it was, spill out onto the apron of his condom. His second load was so much sweeter than the first. He smiled at her, delighted she'd gone so far with him despite her grumpy mood. "Miss me?" he teased. She crossed to him and she kissed him while it began to come back to him. He felt her hands straying where a second time had been impossible before, and he leaned into her for a better kiss. "You're loving me," he said in a daze as her hand moved down his back and over his ass. She opened his condom with one of his latex gloved hands and slowly removed it. "Miss me?" he teased.
