Monarchs: A 3D Top Down Total War RTS Game in the franchise of The Settlers Of Catan. Inspired by the original The Settlers Of Catan board game. Build your own Colony and claim lands to gain power over other players in the game. Complete tasks to gain power, but be careful not to lose it to another! My favorite part is building the cities and watching them grow! Enjoy! Overview: Features Choose from 2 starting civilizations, each with their own strengths and weaknesses. Build a town by laying down roads, building buildings and casting spells Discover other civilizations and claim lands to gain power Start the game on an 8 x 8 tile map and increase your empire to a hex map Choose to play one of 6 civilizations including Vikings, Tuskmen, Dwarves, Samurai and Romulans Power up your nation using experience points to become a super power Unique multiplayer modes! Play in single player, local, or online multiplayer Gamepad support The full version includes... - Game Center - Multiplayer Features Crossovers from Civilization Our full list of games: 1-4 players locally 1-4 players online Controls... > where is my savefile Yeah. I'm using awesome WM all the time, but I made it a fallback of sorts. Nothing else is effective. Laserboy: in /home/\$USER/.purple, or somewhere in the disk. Laserboy: there are two places where you can store a file on your computer damnit Laserboy: /home/[username]/.purple/downloads/saved_files.log hey, how would I go about logging myself out? I'm on wayland, unity7 doesn't have the option, unity8 didnt work as the xwayland bridge was missing, unsure as to what unity8 looked like with xorg since it would crash unity7 i haven't tried on anything else and in xorg it was giving my a blank screen DaemonicApathy, I was in there already Laserboy: create it for yourself in ~/.local/share/ubuntu_sounds/, or if you are running kubuntu in ~/.local/share/keyrings from a ctrl+alt+t it just put me back in the login screen I'm not sure where you'd create it with KDE. DaemonicApathy, there is no ~/.purple/downloads is there any way that I can tell what DISPLAY is set to? I've been reading through the partitioning guides on the wiki about UEFI stuff and I'm not sure if I'm doing this right What shall I do with the Fedora entry in the second step? Should I do the same as the Ubuntu entry? Just erase it? as nothing other than that is going to be visible on another seat is there anyway to grep for it in /proc? Hmm... I'm not sure how to do that I
