The default search engine in the software. You can choose whether to keep it as the default after installing the software or not. Main Functionalities: Help: What is the address of the official page of the software, with the list of programs related to it? Install/Uninstall: How to install and uninstall it? Can you install it in protected or non protected mode? Does it work with uninstaller? Does it delete the files in the program files folders? Advanced Features: Automatically locks your system when you start the computer or logout, so that after you logout, you have to use the same account and password to log back in. Automatically unlock the system, leaving you the option to start up with another user. Uses HTTPS when downloading updates Svift Support: How can I get support for Svift? How can I contact someone in order to get support for Svift? Other: Available languages: Svift is the good software, but few of its properties need attention. When you start Svift, it asks you if you want to use "svift.exe as the default software launcher" or "use windows files and folders". Select the option "Neither" to disable this option. This is easily done. Copy Svift.exe from C:\Program Files\Svift to C:\ and double click Svift.exe to run it. Next, select the option "I do not want Svift to use files and folders to launch the applications", and set its position to 2 (2=the highest). The Svift add-in (see add-in) keeps the windows of both the applications in front when they are launched. If you have problems launching the applications with it, there are two ways to solve it. 1- Hold CTRL while launching it. 2- While Svift is loading, press CTRL+ALT+DEL and select "Task Manager" from the list. You will find in the right side of the windows called process explorer. A process called svift exists and is "svift.exe". Deleting it will disable Svift entirely. Now Svift will not use the files of the applications. Kategorie: Software b7e8fdf5c8

“Run” files The application is quite lightweight and only lists the programs that run on your computer. These files are not programs, but executable files. With the help of the application, you can launch a.exe file from the Windows “Run” dialog box, because it is displayed for every type of program that is registered for executing.exe files. The application supports the Windows “Open” dialog box, but if you want to launch a file from there, you should first save it using the “Save as” option. Help window The application has a built-in help system. There are two ways to use it: - help - the window displaying the help information will pop up when you click on the help button on the toolbar; - Display the help window - you can display the help window manually by pressing F1. What's new in this version: 1. Added support for the Windows 10 Anniversary Update. 2. Added service for Windows Update checking.” “EZ Exe is a convenient and easy to use application launcher. It allows you to search the desired applications by using simple keywords, which you choose from a toolbar. Besides, you can launch files, documents, and other files with the help of this program. If you want to launch a file for the first time, you should first save it to the desktop with the help of EZ Exe. Key Features: Automatically create desktop shortcuts to launch The program automatically adds a shortcut to the desktop that will allow you to open the application you choose. Extended search for programs using keywords You can use a file browser to choose the desired program manually or search for it with keywords. This is especially convenient when you're working on a number of programs at once. Auto run of executable files This program allows you to run.exe files that are associated with any other program. It is especially convenient when you want to use a folder or the Internet as a source of applications. Programs launch directly You can launch a specific program with one click by using the “Run” option on the toolbar. The program will be launched in the background and you can continue working without switching to the main system window. Can run files from the Windows “Open” dialog box If you want to open an executable file that you haven't used before, just save it to the desktop using the “Save as
